[10 Dec 2022 – Current]

MERN Stack Freelance Developer

Upwork

City: Faisalabad

Country: Pakistan

1. Developed a keyword sorting application to assist with SEO keyword filtering
2. Refactored and updated a legacy codebase, enabling it to be hosted on a private dark web server using aaPanel
   a. Configured the codebase to run with onion routing, enhancing its security and privacy features
3. Adopted a rust-wasm encoding library and integrated it with NodeJs/ Typescript on the server-side
   a. Modified the encoding library to enable the encoding and decoding of large binary files (up to 2-3 Gbs) by streaming them through the encoder.

[1 Jun 2021 – 10 Dec 2022]

React Js Freelancer

Fiverr.com

City: Faisalabad

Country: Pakistan

1. Bug Fixing
2. Product Landing Page Developement
3. Design Implementation from Figma to React js

5. Finding solutions to optimize app performance

[1 Aug 2021 – 12 Aug 2022]

MERN Stack Intern (Frontend Oriented)

EPTeck

City: Faisalabad

Country: Pakistan

- **Product Landing Page Website**
  - A responsive and modern website landing page development.
  - Used React Js as the Primary Driver and Tailwind Css as the design Language.
- **Legacy React Js Code Refactoring & Optimization**
  - I was responsible for the maintenance of old legacy code of a frontend dashboard.
  - Optimized and Refactored the legacy frontend dashboard and improved the initial web page load from 4.7 seconds to 920 ms.
- **Analytical Dashboard Design and Development**
  - Designed the UI of the dashboard in Figma & Adobe Illustrator
  - Developed a Frontend Dashboard with React Js which was used to visualize a bunch of metrics and data.
  - API Testing with Swager and Integeration with 55+ APIs and 7+ Pages from a backend pre-written in java spring-boot.
- **Backend Cloud Service**
  - Shell Scripting through Node Js
  - Implemented RPA through Node Js for automatic backend server creation through the Parse Platform Server.
  - Integration with many MongoDB databases.
  - Designed and Developed a MongoDB Instance to store auth data and credentials of other active MongoDB Instances.
